Relevant Experience

Ross Stores NYBO, Manhattan, NY   Apr 2016 – Present
Merchant Support Administrator

- Increased operational efficiency by entering 20%-30% of division's approved spending (>$300K) orders every week.
- Managed inventory movement by marking down 100s of SKUs with gross retail value upwards of $100K monthly.
- Eliminated outdated and inaccurate info by executing 300-400 financial and data tracking edits weekly.

Antandre.com, New York, NY   Sep 2015 – May 2016
Engineer Intern

- Implemented PlusMargin to maximize sales opportunities identified by CEO.
- Utilized MailChimp email marketing to build relationships with leads and customers.
- Integrated AVS and CVS fraud and chargeback protection features via Signifyd API.
- Added Signifyd webhooks to track the review and approval of credit cards.
- Optimized user experience by updating models, layout, functionality, and user inputs.

Musae.me, New York, NY   Aug 2015 – Nov 2015
Engineer Intern

- Built out URL mapping for easy site navigation.
- Maintained regular remote communication through Slack and Google Hangouts.
- Created front end UX by following Patternlab's Atomic Design methodology.
- Collaborated with engineering team to accomplish sprint goals each week.
- Developed user models to capture and persist relevant data to database.

General Assembly, New York, NY   Nov 2014 – Feb 2015
Engineer

- Worked on a dev team to create a web app that displays a curated list of comedians performing nearby.
- Created an online chatroom app which allows users to provide a username and avatar and send IMs in a browser window.
- Planned, organized and tracked projects, sprints and user stories using Trello.
- Designed and built a CRUD FIFA World Cup Wiki where users can log in and add FIFA World Cups wikis and admin can remove.
